ANNUAL PRICE LIST NEWER GLADS

Spring 1942

EVERETT CLARK

POQUONOCK, (WINDSOR) CONNECTICUT

FOREWORD

And now it's 1942 — and time to list again those varieties of "Glad" which have proven to be best sellers and prize winners, as well as the varieties which are merely, beautiful, popular, time-tested old favorites.

The growing season this past year was first, very wet, with rain most frequently; then the other extreme; hot, dry weather with weeks of no rain. In spite of these varied conditions in the weather, our "Glad" fields were the subject of comment from visitors, both local and distant. Many "Glad" enthusiasts remarking that in all their visits of other fields they had not seen such color and size of flowers and stalks as were apparent in our fields.

To those who purchased bulbs or flowers from us we say "thank you," and in sincerity we urge others of you to become, with your friends, "Glad" enthusiasts.

Terms: Single bulb or bulblets at the ten rate, but no single item for less than five cents. 25 bulbs or bulblets at the 100 rate; 250 at the 1,000 rate. Pints and half pints in generous measure at the quart rates. Prepaid spring delivery on all orders over \$2.00 — except for F. O. B. prices.

Cash, please. With the following extras of your selection: On orders up to \$5.00 you may select 10% in extra bulbs; \$5.00 to \$10.00, 15% in extra bulbs; \$10.00 to \$20.00, 20% in extra bulbs. Over \$20.00, 30% in extras. If you purchase large bulbs only in lots of 25 or more and will call for them or pay express charges, you may take a cash discount of one-third instead of extra bulbs. The above extras and discounts do not apply to F. O. B. quotations. Gratis bulbs for the names of your glad-loving friends.

Stocks of bulbs for 1942 guarantee the same bright, clean, healthy stock as usual.

NEWER GLADS - Spring 1942

This year, I have a number of extra large jumbo bulbs. If you wish these bulbs, specify, and send your order in early. The bulbs I prefer to grow myself and will use in filling orders are plump, high crowned stock grown from bulblets or small planting stock. (L) large, (M) medium, and (S) small sizes are those common to the trade. Large bulbs can be depended upon for the finest spikes. Medium size bulbs will prove very satisfactory. Small bulbs may do well. Varieties in the 40-25-15 range, such as Aflame, Aida, Yvonne, may also be purchased in standard sizes per 100 as follows: No. 2, \$2.40; No. 3, \$2.00; No. 4, \$1.50; No. 5, \$1.00; No. 6, 60c; prepaid delivery.

Gladioli are very easy to grow. Following are a few of the principal rules to follow:

Select a place in the open garden where other tall growing plants will not shade them. Glads like and need full sunshine. Mix with the soil, any good grade of commercial fertilizer or well rotted compost or manure. Select good healthy bulbs. Place them in a trench at least five inches deep and about three inches apart in a straight or staggered row. Cover at once. It is better to plant deeper than too shallow. One or two light applications of fertilizer during the growing season, before buds appear, will help insure good spikes.

Join the Connecticut Gladiolus Society if you live nearby. You will be warmly welcomed by its members. Send the dues of \$2.00 to me and I will be glad to forward them to the Secretary.

SATISFACTION GUARANTEED

Successful control measures include the following:

(1) Treat the bulbs with Cyanogas-G or other fumigant upon cleaning the bulbs in the fall. Small quantities of bulbs may be put in paper bags or shoe boxes and sprinkled with Napthalene flakes—1 ounce per 100 bulbs. Let the flakes evaporate. (2) Store in a cool, dry place and keep at a temperature of 40 degrees. Do not let the bulbs freeze. (3) Treat or soak in a solution of bichloride of mercury (corrosive sublimate) before planting. Husk the bulbs previously, if possible. Soak for two hours in a solution of 1.1000. one tablet to one pint of water. Use stone crocks, glass jars, or wooden tubs—not a metal container. Large numbers of bulbs may be tied in sacks and kneaded on the floor in lieu of husking. Thorough soaking will destroy all thrips and their eggs. (4) Spray every week or ten days after the plants are six inches high. Do not wait until the buds appear. It is too late then. Effective spraying will control those thrips that have survived or that may appear from nearby infestations.

Tartar Emetic, used as follows, has proven very satisfactory in controlling thrips. Tartar Emetic 4½ teaspoonsful, sugar 1 2/3 cups, water 3 gals. Apply late in the afternoon or early evening.

The following were the first to bloom for me last year: Mibloom, Cara Mia, Aida, Maid of Orleans, Miss Bloomington, Schwabengirl, J. S. Bach, Mary Frey, Max Reger, Excellence, Ave Maria, and Yvonne.

Among the newer ones: Coral Glow was the most striking although Magnolia and Sensation were wonderful. Margaret Beaton is still near the top. Zuni is apt to come stubby, but truly grand when right. Aladdin is a beautiful flower but too short a "handle." I still have to rate American Commander second to Com. Koehl. Buffette is way ahead in its color class. Capeheart grows tall, straight, with large pleasing flowers. Flora Farmer did not come up to standard. Jasmine, I'm afraid, is too soft. Myrna is very reliable and much in demand. You should have this one. Purple Beauty is nice but must be cut when it first opens, otherwise heavy dew or rain will spoil it. Red Bank was very, very nice. Shirley Temple is too crooked, especially from large bulbs. Timbuctoo was especially nice. Individual flowers are large and nicely colored. I like this one.
